ANQ review plan

Basis: **National Quality Agreement**

Status: **January 2021**

Acute care

Indicator	Method	Tool
Adults		
Patient satisfaction	Survey	ANQ short questionnaire
Postoperative wound infections	Swissnoso programme	SSI surveillance module
Potentially preventable readmissions	SQLape	Medical statistical data Swiss Federal Statistical Office (BFS)
Falls and pressure ulcers	Prevalence review	LPZ International
Knee and hip implants	Registration	SIRIS implant register
Spinal implants	Registration	SIRIS implant register
Children		
Patient satisfaction	Parent survey	ANQ short questionnaire
Postoperative wound infections Appendectomies	Swissnoso programme	SSI surveillance module

Psychiatry (1/2)

Indicator	Method	Tool
Adults		
Patient satisfaction	Survey	ANQ short questionnaire
Symptomatology	Data collection method: self-rating Data collection method: third party rating	BSCL HoNOS
Freedom-limiting measures (FLM)	Documentation	Adult FLM

Psychiatry (2/2)

Indicator	Method	Tool
Children and adolescents		
Patient satisfaction	Survey	Ruhr University MHRTC CAP-A (adolescents) Ruhr University MHRTC CAP-P (parents)
Symptomatology	Data collection method: self-rating Data collection method: third party rating	HoNOSCA-SR HoNOSCA
Freedom-limiting measures (FLM)	Documentation	FLM-CAP

Rehabilitation (1/2)

Indicator	Method	Tool
Adults*		
All areas of rehabilitation		
Patient satisfaction	Survey	ANQ short questionnaire
Geriatric, internal, musculoskeletal, neurological and oncological rehabilitation		
Objectives of participation	Documentation Main target and target achievement	ANQ target documentation
Functional capacity in activities of daily living	Third-party rating	Extended Barthel Index (EBI) or FIM®
Cardiac rehabilitation		
Objectives of participation	Documentation Main target and target achievement	ANQ target documentation
Physical capacity	Review of capacity	6-minute walk test Cycle ergometry
Quality of life	Self-rating	MacNew Heart

Rehabilitation (2/2)

Indicator	Method	Tool
Adults*		
Pulmonary rehabilitation		
Objectives of participation	Documentation Main target and target achievement	ANQ target documentation
Physical capacity	Review of capacity	6-minute walk test
Quality of life	Self-rating	Chronic Respiratory Questionnaire (CRQ)
Rehabilitation in paraplegia		
Objectives of participation	Documentation Main target and target achievement	ANQ target documentation
Functional capacity in activities of daily living	Third-party rating	Spinal Cord Independence Measure (SCIM)
Psychosomatic rehabilitation		
Objectives of participation	Documentation Main target and target achievement	ANQ target documentation
Somatic symptoms and impairment	Self-rating	Patient Health Questionnaire (PHQ-15)
Anxiety and Depression	Self-rating	Hospital Anxiety and Depression Scale (HADS)

*There is currently no measurement requirement for Pediatric Rehabilitation.
